

Belkin Trueclear Pro Screen Protector Warranty Terms

Only Euronics trained personnel will install the safety glass. Properly installed safety glass provides the best protection for the screen of the device for a long period of time.

If the following defects appear on the screen protector after installation, the buyer is entitled to receive a new safety glass with installation:

- Air bubbles remain on the safety glass for 30 days after installation.
- Defects in the safety glass material (poor transparency, spots inside the glass).

The warranty for the installation of safety glass does not extend to the following cases:

- Air bubbles (especially at the edges) caused by natural use, formed more than 30 days after installation.
- Damage to the safety glass due to falling or misuse.
- Air bubbles or injuries caused by intentional bending or removal of the safety glass.
- Scratches and mechanical damage on the safety glass.

Installing the safety glass if the device has been previously scratched or bent: If the device on which the safety glass is to be fitted is pre-scratched or bent, the installation of the safety glass is the responsibility of the customer. In this case, Euronics cannot guarantee the installation of the safety screen, as there is a possibility that air or dust may have entered the existing scratches, which will interfere with the complete fusion of the safety screen with the screen. Also, in the case of a bent device, the safety glass may break or become detached due to internal stresses.
